KoltiTrace FarmCloud is a mobile application to support all farmers' needs, from instant access to high-quality agri inputs, safe digital transactions, receiving ePayment from collectors, interacting with agri-input suppliers, to helping farmers get capital to support their farm development.

Here's how FarmCloud can help improve farmers' quality of life:

Access to Training Materials,
From the Agronomists and Field Agent in Koltiva.

Access to Finance, Trusted access to capital.

Access to Larger Market, Connecting farmers to suppliers, buyers, and gri-input shop.

"Backed by Agronomists and Field Agents, FarmCloud offers digital advisory from upstream to downstream, connected to all integrated ecosystems in Koltiva, from agriculture and finance to larger markets."

FarmCloud's Benefit For Farmers

Easy Access to High-Quality Agri Inputs

Connecting Farmers with certified agri-input suppliers. Interacting with registered agri-input suppliers is made easy by SMS and phone call features.

Safe Digital Transaction for Farmers

Experience the convenience of easily carrying out digital transactions, from paying electricity bills, buying phone credits and mobile data, receiving ePayments to buying agri-inputs. All with KoltiPay available in FarmCloud.

Easing Access to Capital

Easy digital finance and access to capital for farmers, enabling them to develop their land.

Access to Digital Market

Farmers are connected to the nearest collectors, which help them in selling their crops through transfers and split payments.

Integrated with KoltiPay

KoltiPay is available on FarmCloud

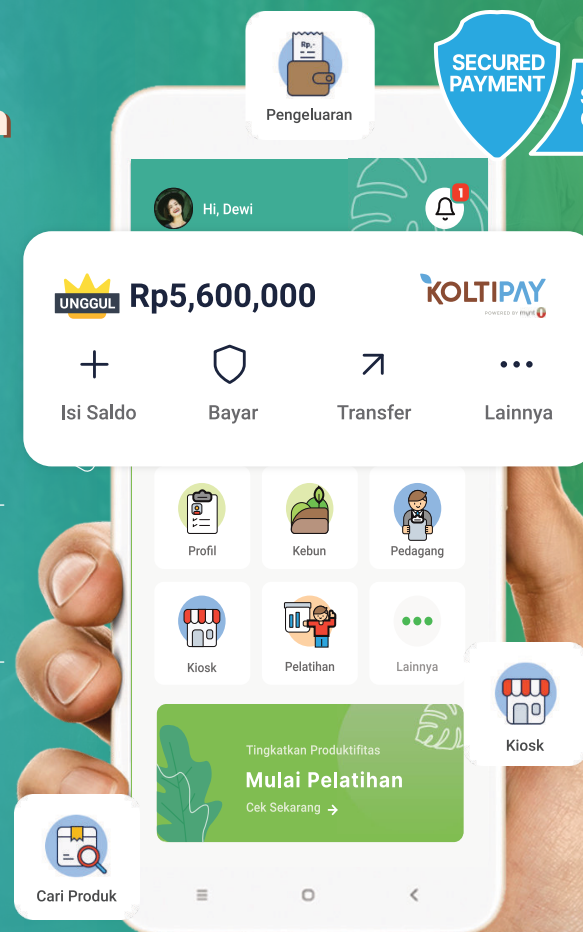

Profit from the transaction goes into the farmer's bank account directly.

Split payment method using cash and bank transfer.

Transaction history can be accessed at any time on FarmCloud.

Save the transaction profit without going to the bank. Half of the profit can be received in cash.

Supported by Koltiva's customer service to help solve any customer challenges.

Go Cashless.
